PART A: STRATEGIC OVERVIEW OF THE ASSEMBLY

Establishment of the District

The Legislative Instrument (L.I) 1386 establishing the Sefwi Wiawso District was enacted on 23rd November, 1988 under PNDC Law 207 and replaced by Local Government Act 493, 1993. It was elevated to a Municipal status in March, 2012 under Legislative Instrument, (L. I) 2015.

The Sefwi Wiawso Municipal Assembly is one of the nine (9) MMDAs in the Western North Region, Ghana. The Sefwi Wiawso Municipality is located in the North Eastern part of the Western North Region and has Sefwi Wiawso as its capital town which also doubles as the regional capital of Western North Region. The Municipality lies between latitudes 6° N and 6 ° 30 ° N and Longitudes 2° 45° W and 2° 15° W and has a total land size of 1,280 sq. Km. It is bounded to the west by Juaboso, Bodi and Sefwi Akontombra, to the east by Bibiani- Anhwiaso- Bekwai, to the south-east by Wassa Amenfi West and to the north by Asunafo South in the Ahafo region

Population Structure

The population of Sefwi Wiawso Municipality from the 2010 PHC was 139,200 with male population of 50.1 percent (69,753) and female population of 49.9 percent (69,477). This gives a sex ratio (104 males to 100 females) as against the region's ratio (100 males to 100 females). With a population growth rate of 1.8% and all factors affecting population changes held constant, the total population of the Municipality for 2021 is projected to be 169,415 with female population constituting 50.1% (84,875) and males making up 49.9 % (84,540). The high pressure on existing socio-economic infrastructure and the constant demand for the expansion and provision of basic infrastructure coupled with regional capital status is critical fallout of this population phenomenon

Vision

District Economy

- Agriculture

The Sefwi Wiawso Municipality is a predominantly rural economy, with agriculture and its ancillary activities being the main live stay of the people. Agriculture employs about 74% of the active population. The annual levels of agricultural production and profitability therefore determine household income levels. Thus, it is significant to note a remarkable improvement in household income and expenditure during the food and cash crops harvest seasons, especially during the cocoa buying seasons of September to February. There is therefore the need to support cocoa farmers with alternative livelihood. Other economic activities that serve as employment to the 26% of the labour force include logging and lumbering, information and communication industry, public and civil service, petty trading, hotel and catering industries, finance and insurance, as well as auto mechanics, dressmaking and hairdressing.

Cocoa is the widely cultivated crop with significant number of farmers involved on its cultivation. The land area which remains uncultivated is the inland valleys (Swampy areas) which have been found to be very suitable for rice production.

Rice production is on the increase with farmers actively involved in its production throughout the Municipality. The Municipality is endowed with vast inland valleys, when developed could contribute immensely towards food security in the Municipality and the Nation as a whole.

The agricultural produce which is processed to some appreciable extent continues to be cassava, oil palm, coconut and sugar-cane. Whilst cassava is processed into flour, dough and Gari, palm oil/palm kernel oil is extracted from the palm nuts, coconut oil extracted from coconut, and sugar- cane processed into a local gin (akpeteshie). However, in all of the above cases, technologies employed are low, resulting in low conversion rates. This has negative implications for the incomes of the farmers, processors and the local economy.

- Road Network

The municipality is strategically located with accessibility to road as its main mode of transportation. The Municipality has a total length of 93.5km of highways, 131.2km trunk roads, 217km feeder roads and 40km urban roads. There are trunk roads linking the Municipality to its adjoining District complemented by numerous feeder roads ensuring easy movement from one community to the other. The roads are important links for the settlements, market centers and farms.

However, the deplorable state of roads in the municipality hampers movement of people and carriage of foodstuffs from the hinterlands to economic activity centers. Nonetheless, efforts are underway in collaboration with the appropriate agencies to fix the bad roads

- Energy

The municipality currently have 83% of communities been covered by electricity. Urban constitute 94% and rural 72%. The district project to achieve 90% coverage by the end of the planned period.

- Health

Even though the health sector is under the direct management of the DHMT, other stakeholders from the public, private, Christian Health Association of Ghana (CHAG), NGOs and the mining companies have over the years contributed in diverse ways to the improvement of the health of the populace by providing out-patient, in-patient and outreach services to the people in the municipality. Looking at the health facilities with respect to the population of the municipality it is recommended that additional health facilities are built to improve access to health care delivery. The category and ownership of health facilities providing health services as well as spatial distribution in the municipality are as shown in Table 1.3

- Education

The Educational Directorate of the Sefwi Wiawso Municipality which is divided into a number of Educational Circuits, runs 277 public and 196 private schools for an efficient and effective management of educational institutions of the Municipality. Table 1.1 presents public and private educational institutions in the district.

- Market Centres

There are functioning market centers in the municipality of which three of them are major and the remaining are minor. The major market centers are located at Sefwi Wiawso/Dwanise, Asawinso and Boako. The Assembly will construct a market complex at Sefwi Wiawso as well as renovation of two markets at Asawinso and Boako respectively to improve domestic revenue by at least 40% within the Budget period

- Water and Sanitation

Currently, the district population with access to sustainable safe drinking water sources stood at 78% which translate into 86% urban and 70% rural. The high demand for water supply in the Municipality calls for drastic measures to increase the coverage in the plan period. The Assembly project to increase municipal-wide access by 19%, urban by 9% and rural by 10% respectively. On Sanitation, the projection is to increase the proportion of population with access to improved sanitation services from 53% municipal-wide to 75%, urban to 85% and rural to 65% within the next plan period.

- Tourism

The Municipality abounds in tourism potentials, which, if harnessed, could serve as the second employment source after agriculture. With the status of Sefwi Wiawso as the Western North regional capital, it is very imperative to develop these tourist sites to boost the local economy to create jobs. The potential tourist sites found within the municipality that are not developed include; The Tree of God (Nyame Dua), Okomfo Anokye Akoma, Abombirem Sacred Tortoise Forest and Ancestral Hole of Bosomoiso

Tree of God (Nyame Dua): The Tree of God is located at Nyamebekyere, a distance of about 5km from Wiawso. It is told that about 150 years ago, a farmer stuck a machete into the stump of a tree. The tree re-started to grow and has continued to grow ever since. Today, the machete is completely surrounded by the trunk of the tree.

Okomfo Anokye Akoma: This is sacred grove located in Amafie, a distance of 3km or 25 minutes' walk from Wiawso the Municipal capital. The legendary fetish priest, Okomfo Anokye of the Golden Stool fame of the Asante Kingdom, was believed to have practiced his trade here. He was reported to have danced and made acrobatic displays on a rope tied between two distant trees, like the legendary Niagara Dare devil of Niagara Falls.

Abombirem Sacred Tortoise Forest: It is a sacred forest preserve in which a giant tortoise lives. When one sees the tortoise and picks it, there turn to be total darkness in the forest. Until such a time that the tortoise is left for light to re-appear, one will not be able to find a way out of the forest. It is located at Sefwi Boako, a 21 km distance from Sefwi Wiawso.

The Ancestral Hole of Bosomoiso: The Royal family of Bosomoiso, a community of 4 km away from Wiawso, is believed to have originated from this hole. It is believed to be

bottomless hole. It is surrounded by trees but no leaf falls into it. The hole is alleged to have healing powers. The map below shows the tourist sites in the Municipalities.

- Environment

The geology of the municipality is predominantly the Upper Birimian and Hornblende rock types. These are volcanic rocks, which have been solidified from molten materials (lava). The occasional granite intrusions give the municipality its undulating nature and form part of the long hill range. These are often steep and strongly dissected. There are gold deposits at Kokokrom, Paboase and Akoti areas. The map below shows the geological formation of the municipality.

The natural vegetation cover has given way to secondary forest over most of the Municipality because of exploitation of timber and bad farming practices. Consequently, Deforestation caused by indiscriminate felling of trees and encroachment by illegal farmers on the forest reserves has become a major environmental concern. In addition, bad farming practices, including slash and burn, have resulted in soil degradation. Also, the heavy rainfall experienced in the municipality cause erosion of the soils, especially on the hilly areas and slopes leading to serious leaching in most of the farmlands.

Another major environmental problem is the disposal of solid and liquid waste in river bodies near major settlements such as the Tano River, Bolowa and Kusin streams near Dwinase, a suburb of Wiawso. Aqua lives in these river bodies are threatened and their numbers have declined over the years.

Key Issues/Challenges

The key prioritized issues of the Sefwi Wiawso Municipal Assembly are;

Poor road conditions

Poor and inadequate educational infrastructure

Gaps in physical access to quality healthcare

Inadequate office space and assembly hall

Poor sanitation and waste management

Poor drainage system and high incidence of flooding

Inadequate supply of potable water to households

High unemployment rate

Poor tourism infrastructure

Low productivity in staple crop production, livestock and poultry, Inadequate extension services, Low application of science and technology in agriculture

Limited coverage of social protection intervention, Low awareness of child protection laws and policies

Low levels of electricity coverage for rural communities etc.

Revenue Mobilization Strategies

Revenues are prerequisite for the implementation of the MMMDA's plans and programmes. The operations and functions of the assembly largely depend on the availability and quantum of revenue. While it may receive some revenue from central government, development partners and other sources, it is also important that MMDAs are able raise money internally. It is therefore imperative that all resources due to an assembly are efficiently collected, recorded, controlled and accounted for. Below are the agreed 2022 Revenue Mobilization strategies in the Sefwi Wiawso Municipality;

Firstly, organize a regular sensitization program on radio, local information centers and Consultative town hall meetings on the Assembly Approved 2022 fee-fixing and also explain to the citizenry about the need to pay tax.

It is noticed that, one of the good procedures for mobilizing revenue should always start with the sensitization of taxpayers and other stakeholders on the need to pay taxes, fees and charges in order to contribute to local development. Assembly staff and assembly members need to go out and sensitize the communities, especially as to how taxes affect the poor and development in the municipality, generally.

Communities should be made aware that the assembly cannot provide services to the communities without money. The assembly must demonstrate a linkage between taxes and services.

Establishment of additional Revenue Pay Points /Offices in the municipality is a considerable factor that will enhance revenue mobilization. Most of the ratepayers are

from the remote communities therefore is very imperative for management to decentralized the Revenue Pay Points for easily payment and collection.

Again, Procurement of Uniform and ID Cards for Revenue Collector and Revenue Improvement Team Members (RITM) increases revenue generation. Field studies have shown that putting staff in uniform alone can increase revenue by 20%. Collectors in uniform are more respected by payers. They receive less payer-confrontation and find it more difficult to carryout malpractices since the public easily identify them.

Also, keeping an updated valuation list at all times which includes all properties within the Municipality is very important. Since Revenue Data is a corner stone of revenue administration therefore is always good to update the revenue data for the realistic planning and budgeting.

Another strategy is to organize Capacity Building Training for Revenue Collectors.

This is intended to improve and update the knowledge, attitude and mobilization skills of resource mobilizers in other to improve their effectiveness and efficiency in resource mobilization process. Eg. Skills in modern ways of revenue collection.

Lastly, Publishing names of tax defaulters in local newspapers, vantage point/ notice board and radio; This action would deter defaulters and result in more revenue collection.

PART B: BUDGET PROGRAMME/SUB-PROGRAMME SUMMARY

PROGRAMME 1: MANAGEMENT AND ADMINISTRATION

Budget Programme Objectives

To provide support services, effective and efficient general administration, human resource management and organization of the Municipal Assembly.

To improve resource mobilization and financial management of the Assembly.

To coordinate the development planning and budgeting functions of the Assembly.

Budget Programme Description

The program seeks to perform the core functions of ensuring good governance and balanced development of the Municipality through the formulation and implementation of policies, planning, coordination, monitoring and evaluation in the area of local governance.

The Program is being implemented and delivered through the offices of the Central Administration, Finance, Human Resource Departments. The various units involved in the delivery of the program include; General Administration Unit, Budget Unit, Planning Unit, Accounts Office, Procurement Unit, Internal Audit and Records Unit.

Total staff strength of Eighty-Seven (87) is involved in the delivery of the programme. They include Administrators, Budget Analysts, Accountants, Planning Officers, Revenue Officers, Internal Auditors and other support staff (i.e. Executive officers, and drivers). The Program is being funded through the Internally Generated Fund (IGF), Central Government Transfers and Donor.

SUB-PROGRAMME 1.1 General Administration

Budget Sub-Programme Objective

To provide administrative support and ensure effective coordination of the activities of the various departments and quasi-institutions under the Municipal Assembly.

To ensure the effective functioning of all the sub-structures to deepen the decentralization process.

Budget Sub- Programme Description

The General Administration sub-programme looks at the provision of administrative support and effective coordination of the activities of the various departments through the Chairman of Municipal Planning Coordinating Unit (MPCU). The sub-programme is responsible for all activities and programmes relating to general services, internal controls, procurement/stores, transport, public relation and security.

The core function of the General Administration unit is to facilitate the Assembly's activities with the various departments, quasi institution, and traditional authorities and also mandated to carry out regular maintenance of the Assembly's properties.
